Dals Lighting Introduces Color Select Plus, Leading the Next Generation of Recessed Lighting

Innovative 6-in-1 lighting technology now available across six recessed lighting families, with an expanded portfolio coming in January 2027.

Blainville, Quebec – DALS Lighting, a leading provider of innovative LED lighting solutions, announces the introduction of Color Select Plus, its latest advancement in recessed lighting technology. Designed to offer greater versatility and control, this innovative technology combines five selectable color temperatures and Dim-to-Warm functionality in a single fixture.

Now available and in stock across six recessed lighting families, Color Select Plus marks an important evolution in DALS' product portfolio, with additional products set to launch in January 2027.

Six Lighting Experiences. One Fixture.

Color Select Plus brings together six lighting options through a single selection switch:

- 2700K – Warm White
- 3000K – Soft White
- 3500K – Neutral White
- 4000K – Cool White
- 5000K – Daylight
- Dim-to-Warm – A gradual transition from 3000K to 2200K as the light is dimmed, recreating the warm ambiance of traditional incandescent lighting.

From functional task lighting to warm and inviting environments, Color Select Plus allows users to tailor their lighting experience to the unique needs of each space.

Designed for Greater Flexibility

Developed with architects, designers, electrical contractors and lighting distributors in mind, Color Select Plus addresses the growing demand for adaptable lighting solutions while simplifying product specification, selection and inventory management.

By integrating six lighting options into a single fixture, DALS offers several key benefits:

- Greater design and specification flexibility
- Enhanced control over ambiance and visual comfort
- Simplified product selection
- Reduced inventory complexity
- Versatility across residential and commercial applications

“Lighting should adapt to the environment and the people who experience it, not the other way around. With Color Select Plus, our goal is to give lighting professionals greater flexibility without adding complexity, making it easier to create the right atmosphere for every space.”

The Beginning of a New Generation

The introduction of Color Select Plus represents more than a technological upgrade. It reflects DALS Lighting’s ongoing commitment to meaningful innovation, combining performance, functionality and simplicity.

With six recessed lighting families already featuring the technology and available for immediate order, DALS is preparing to further expand its Color Select Plus offering as part of its January 2027 product launch.

This expansion will bring the benefits of adaptable lighting to an even wider range of applications, reinforcing DALS’ commitment to shaping the next generation of lighting solutions.
