

SLIDE 24V

This 24V driver and dimmer connects to a 120V input, converting it to 24V and providing precise dimming control for your 24V low-voltage lighting.

DD2448

Model	Size	Dimmer	Switch	Minimum load	Maximum load	Input voltage	Output voltage
DD2448	4-1/4"	✓	✓	5 W	48 W	120 VAC	24 VDC

Specifications

LED driver and dimmer in one unit
Indoor use only
Input: 120 VAC ~ 1.0 A, 60 Hz
Dimming range: 100% - 10%
Dimming type: TRIAC edge cut
Fits in a standard electrical box
Single pole
Works with all dimmable 24V lights
5-year warranty

Finish

☐ WH White

Note

Does not work with DALI smart lights.
Requires a neutral wire. Works in a single-pole setup only.
